

Logical Agreement

A Matching Game

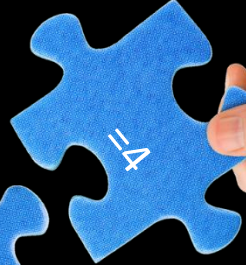

Logical Agreement

One last way we
have to think about
agreement is in
terms of ideas and
point of view.

Can you spot the
mistake in this
sentence?

920

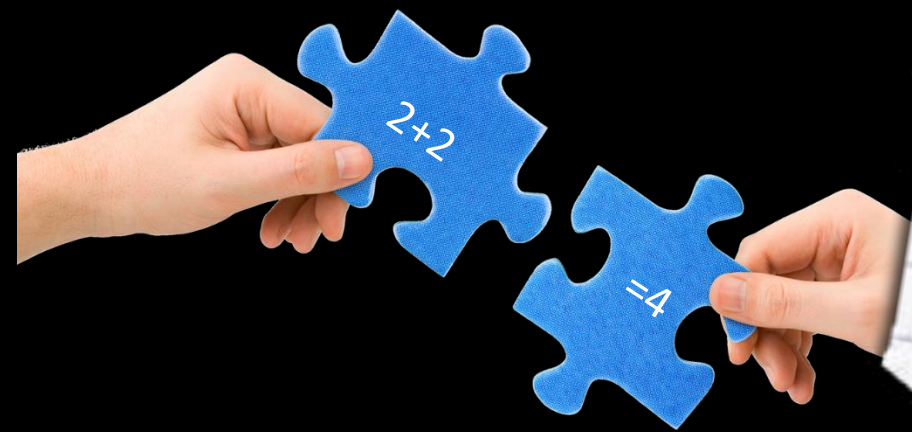

Finally, I heard the three
words I'd be waiting for,
"Will you marry me?"

Finally, I heard the **four** words I'd be waiting for, "Will you marry me?"

☿ If you say three words are coming up, then give people three words.

✧ This is a mistake that requires careful proofreading.

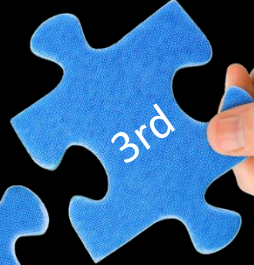

Your mind will sometimes fix these kinds of mistakes and often you won't even see them. Have someone else read through your paper to check for these things. ☿

Point of View

Another kind of agreement we have to pay attention to is point of view (POV)

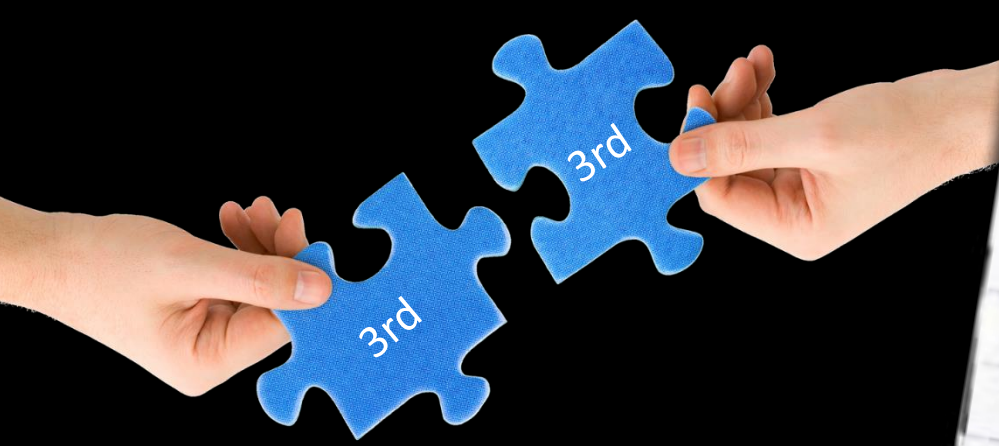

Check out this sentence

People stay healthy when **you** eat well and exercise.

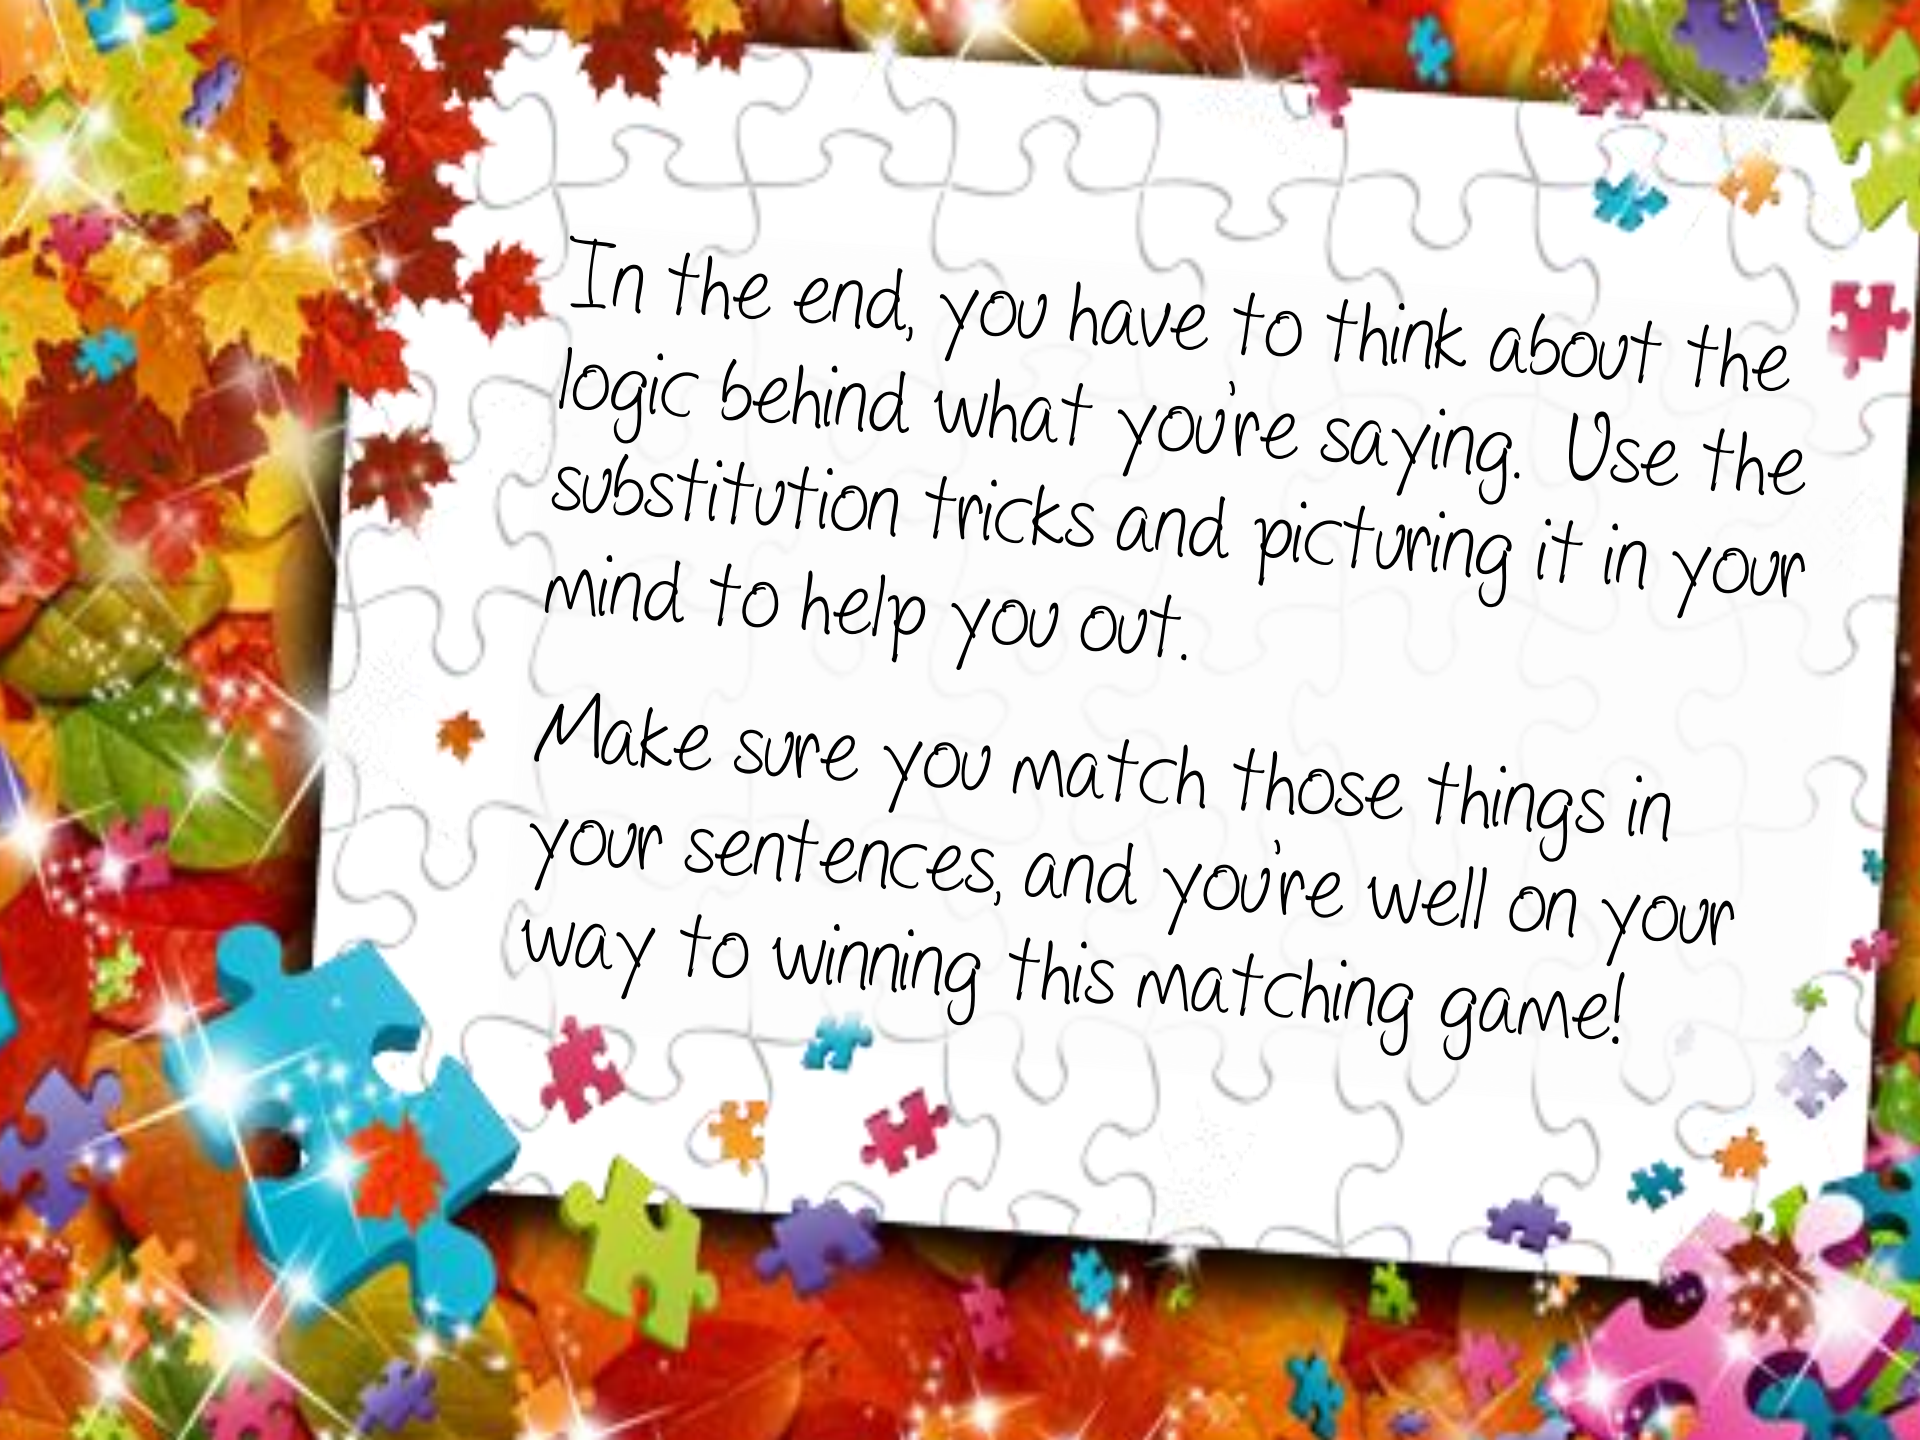

People stay healthy
when **they** eat well and
exercise.

This often happens
with a **you** creeping
in out of place, or by
trying to avoid using
the **he/she**
construction.

In the end, you have to think about the logic behind what you're saying. Use the substitution tricks and picturing it in your mind to help you out.

✿ Make sure you match those things in your sentences, and you're well on your way to winning this matching game!
